NOVEL ROLLING ELECTRIC ROADWAY.

The electrical roadway shown in the picture is in daily use at Cleveland, O., and it has been found to serve its purpose admirably. It is built up a steep incline 420 feet in length, having a rise of sixty-five feet altogether. This roll

ing roadway will accommodate 600 heavily loaded vehicles daily and has been such a success from the start that others will be built in the immediate vicinity. Many other towns, too, are preparing to introduce the novelty.

BRIDGE.

Bridge, it would appear, is not quite so modern a game as has been supposed. A writer in the London Saturday Review mentions a letter he has received in which it is stated that the game was played as far back as the seventies by the Greek colony in Manchester.

From the Bluffton, Ind., Banner: "When tired out, go home. When you want consolation, go home. When you want fun, go home. When you want to show others that you have reformed, go home and let your family get acquainted with the fact. When you want to show yourself at your best, go home and do the act there. When you feel like being extra liberal, go home and practice on your wife and children first. When you want to shine with extra brilliancy, go home and light up the whole household."
